enjoy all the sunlight and shimmering beauty of the most architecturally and functionally superior window on the block. The new Tru-frame® vinyl Greenhouse window. Because we've taken the best of everything you could want and put it all right here for the world to see.

**It's Nicer to Have Around.**

Each greenhouse window features a tough, durable vinyl frame in white or almond color that never needs painting, and is maintenance free. With rounded corners they're stronger and safer to have around your house because the edges don't protrude. They're prettier too.

Inside, we've got fully adjustable, tempered-glass shelves. So you can have plants of different sizes, instead of half-dozen look-alikes.

touch of a fingertip. They even have self latching security locks.

**It's Strong, Sunny and Warm.**

We can't promise your plants will grow better with our greenhouse window. But they'll be supported better with our rugged fusion welded PVC vinyl frame construction. It carries more weight, won't sag, and is virtually indestructible.

Tru-Frame® Greenhouse windows are one of the most energy efficient windows available in single or double-glazed insulated glass. So you'll let the sunshine in without losing heat in the winter or air conditioning in the summer.

There's also a clear view of nothing but glass to the outside. With no support bar, no obstruction and no problem for cleaning or dusting.

**It's Better, Top to Bottom.**
